ADVANCED BLOOD PRESSURE REPORT

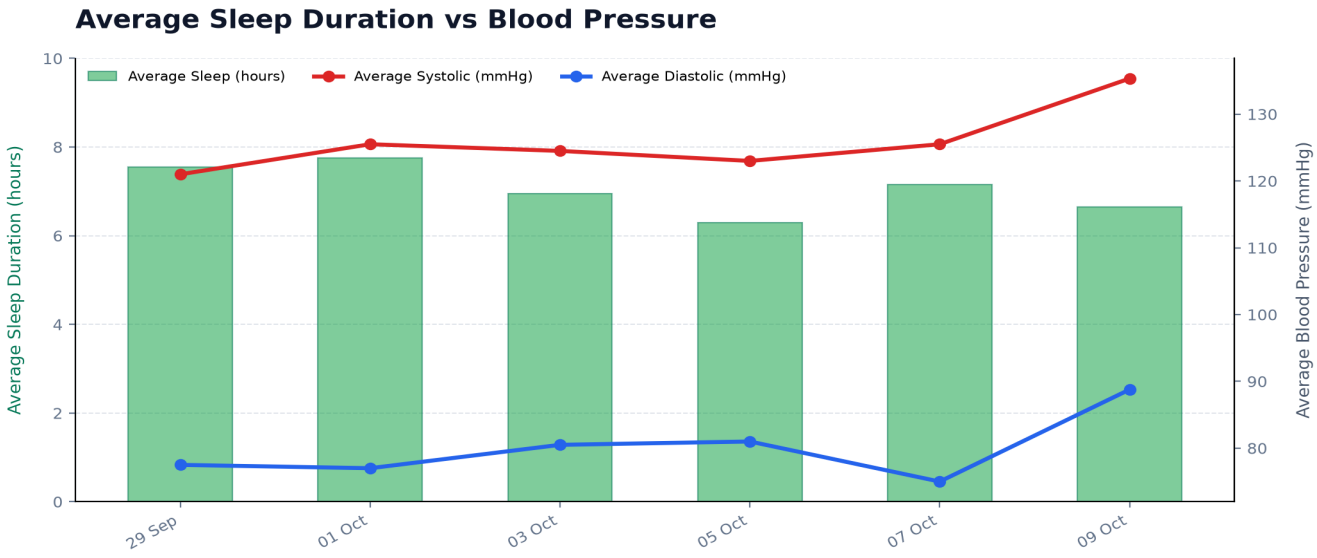

REPORT PERIOD	DATE RANGE	GENERATED
2 Weeks	29 Sep 2026 – 12 Oct 2026	12 Oct 2026, 03:18 PM

Blood Pressure Trend

MEASUREMENTS	AVERAGE SYSTOLIC	AVERAGE DIASTOLIC
19	129.3 mmHg	83.2 mmHg

Blood-pressure chart: non-overlapping 2-day groups. Each point represents the mean of available measurements in that group.

Green bars represent average sleep duration in hours. Red and blue bars represent average systolic and diastolic pressure in mmHg, respectively. Sleep and blood-pressure values use separate vertical axes because their units differ. Groups without matching sleep and blood-pressure measurements are omitted. This chart shows an association between recorded measurements; it does not establish causation.
